

How do I use NetDocs with Joinder

Angus Zuklie - 2021-01-23 - Other Applications

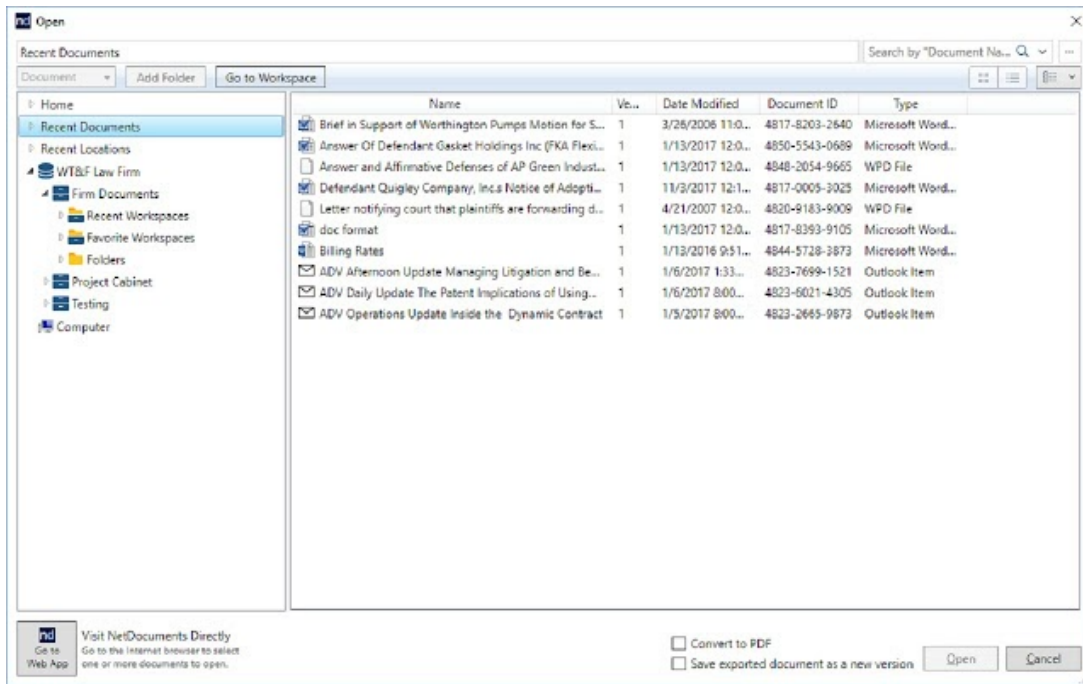

You may have files in NetDocs that you want to reference or add to Joinder or copy from Joinder to NetDocs. These may be files in Records or Documents in a Task.

To copy a file from NetDocs to Joinder

First, download the file(s) from NetDocs

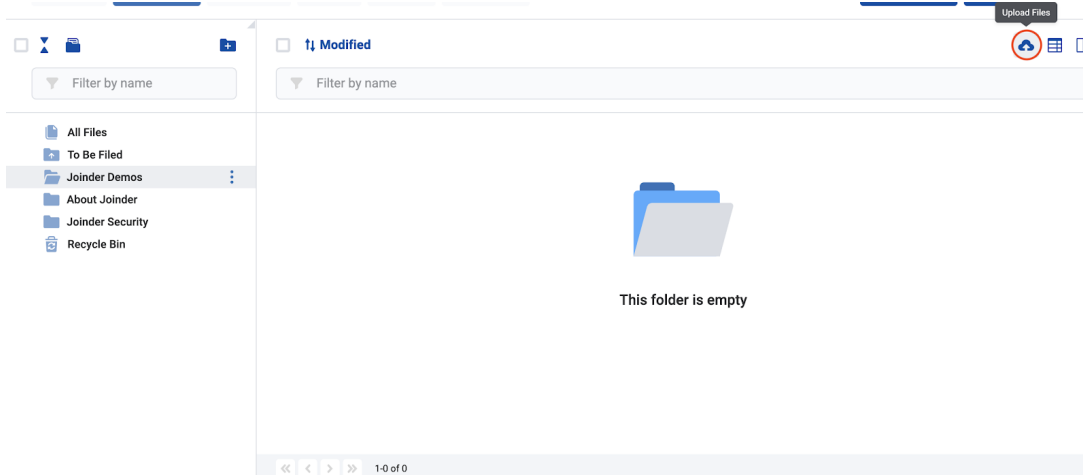

If you're using the [NetDocs Chrome extension \(Windows systems only\)](#), once again download from the file(s) manager

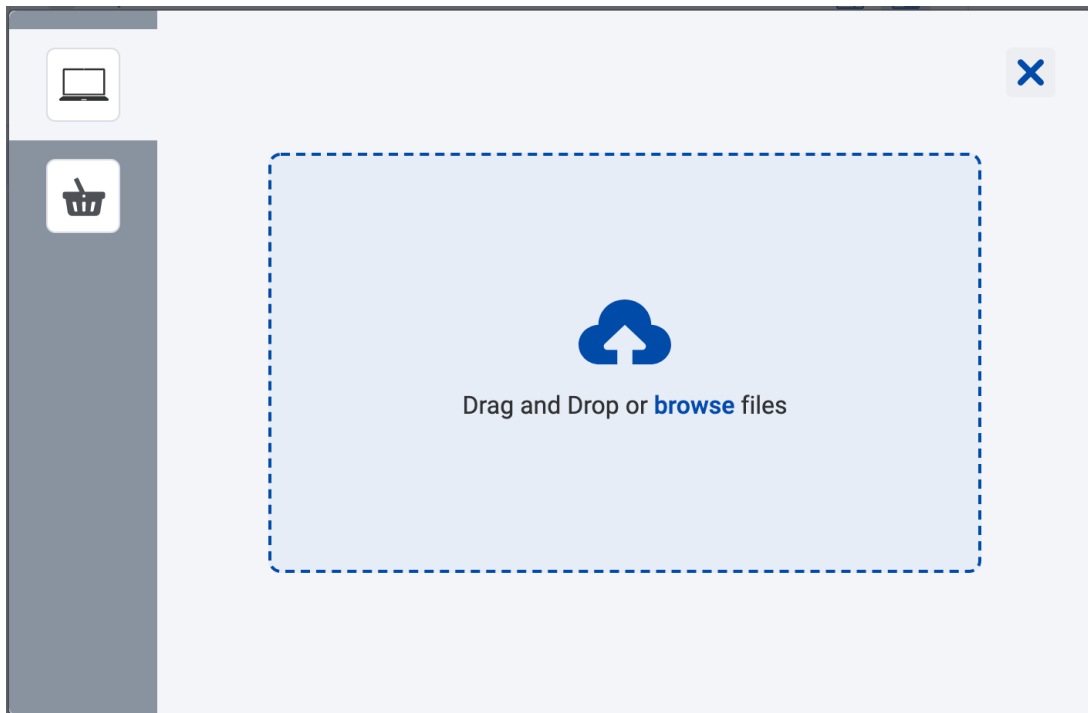

To copy the file(s) to Records

Select the destination folder, then drag the file(s) from your local drive OR

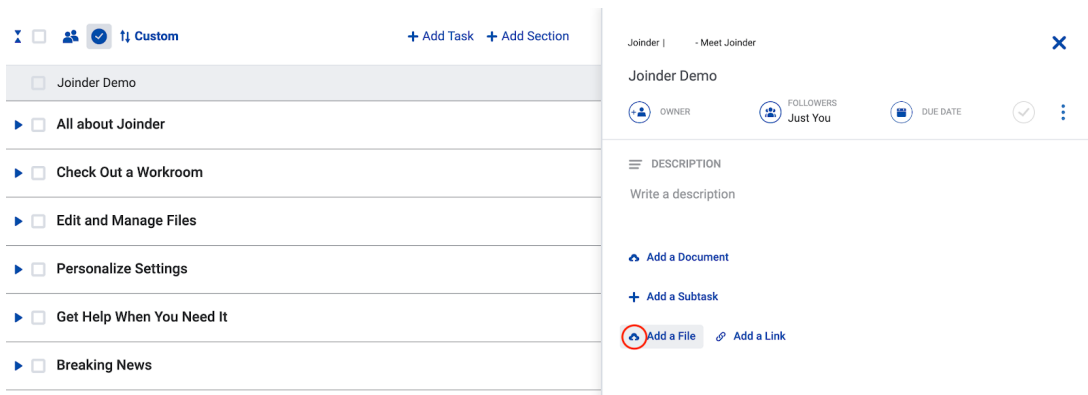

Open the uploader

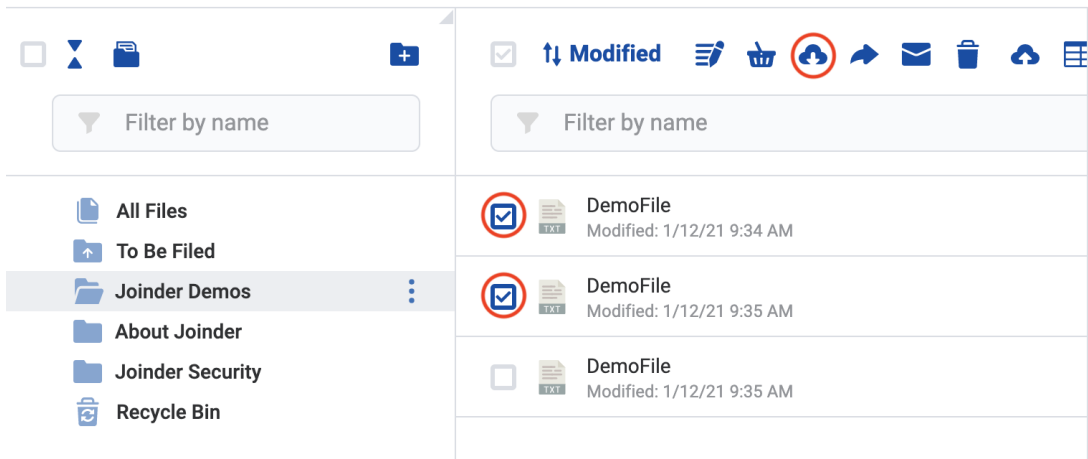

To copy the file(s) to a Task

Open the Task, then upload the file(s) as a document or a reference file

To copy a file from Joinder to NetDocs:

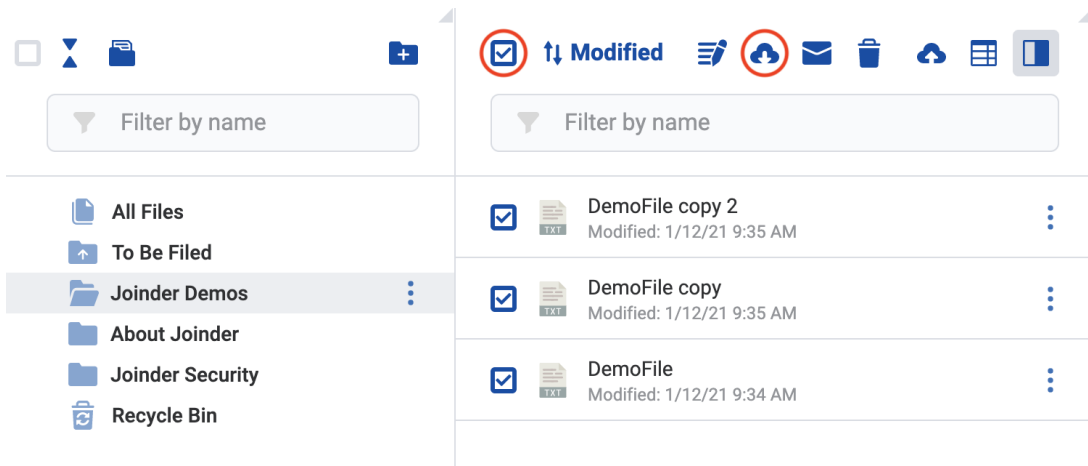

Find the file(s) on Joinder, then select multiple files and download or open the menu and download

Upload to NetDocs

To copy folders from Joinder to NetDocs

Find the folder(s) in Joinder, then download to your local drive

- Upload to NetDocs
